

DANZA ATTACK

TECHNICAL MEANS

It's necessary a level and clean space, at least 15 m. diameter. The height until the top of the tent is around 4 m. It is advisable, if it is too hot, to install the tent in an area protected from the sun, the strong winds and also well ventilated. It's important that the theatre company's lorry could stay close to the tent. The tent, at first, doesn't need anchorages to the ground.

Organization will have to put fences around the tent (60 linear meters) in order to organize the space and the groups of spectators. Two people of the organization always will be in charged of the control and the guiding of the spectators, during all the shows.

Power supply for illumination will be prepared in the chosen place at the time of the beginning of the assembly, and will be of 20 Kw. Power supply for sound and electronic equipments must be different than the illumination one, and it will be of 3 Kw. From the fit up of the tent until the disassembly time, there will be a service of vigilance in the place.

It will be necessary 4 people for unloading, fitting up, disassembly and loading works.

Unloading and fitting up work can take 4 hours, disassembly and loading work can take 3 hours.

It is better that the performances will be programmed at sunset, nightfall or night.
